

Measurement system specialist

About the Beep foundation

Beep aims to develop digital tools that are as accessible as possible for beekeepers, in terms of utility, ease of use and costs. Subsidies and cooperation with partners make open source development possible. Beep goals are: To modernise beekeeping practices, contribute to the conservation of our nature by helping more bees to survive and enable systematically registration for scientific analysis. Beep consists of a free digital logbook for beekeepers and a remote measurement system. The app and more information on Beep can be found at <https://beep.nl>.

About the Beep team

Beep has a small team and enjoys the discovery and development of digital tools for beekeepers. This creates a lot of opportunity to learn. We like to make it easy to use, professional and attractive. Our office is located on a green, quiet spot in Driebergen, next to an apiary.

About the B-Good project

In this position you will contribute to Beep's work in the EU B-Good project. The project goal is to supply beekeepers with a decision-making tool that will provide comprehensive analysis and advice based on the flow of data from the beehives and their environment. This EU-funded project started in June 2019 and will run for four years. The project consortium consists of 17 partners from 13 European countries. More information can be found at <http://b-good-project.eu/>
